Introducing
Ducky Bot

#HackForGood

Hello!

I'm Ducky 👋

I am here to debug your mind, on Twitter.

What is Ducky Bot?

Let's see 👉

A **wellness** companion among your feed

- Ducky is a wellness/tweet awareness tracking product
- User's interact with the Ducky Account which prompts them to rate a few of their tweets.
- The ratings are used to give users **analytics** into their mental health & wellness via a **web dashboard.**

Benefits to Twitter

- Uniting profit and **#purpose**
- With user-driven data -> **craft more robust and engaging content delivery streams** using ML
- **Impact: Powerful marketing, amplified interactions, and happier users**

Using #TwitterAPI

- Developed a Twitter Bot
- Gets a recently status post from your RT'd tweets.
- Direct messages user

The Ducky Bot story

#Inspo + #Design

We discussed how we use Twitter and then began designing on Figma

#TwitterBot

Used the Twitter API to build our bot and fetch data and converse with users

#GooseAPI

Used Docker, Python, and Javascript.

#Dashboard

Used React and HTML/CSS to create a dashboard
